

YESHWANTH RAO YARASI

Iowa City, IA 52246 | (475) 988-6077 | yyeshwanth004@gmail.com

PROFESSIONAL SUMMARY

Dedicated Voice Support Specialist with 4+ years of hands-on experience troubleshooting enterprise voice communication systems, VoIP platforms, and telecommunications infrastructure. Proven expertise in Avaya PBX systems, SIP protocol diagnosis, call quality analysis, and device configuration. Skilled at resolving complex telephony issues including phone hardware problems, client software errors, headset compatibility, driver/firmware updates, call flow routing, and carrier connectivity challenges. Strong proficiency with ITIL-aligned ticketing systems, incident documentation, and escalation procedures. Healthcare IT background with solid understanding of HIPAA compliance, clinical environment requirements, and 24/7 operations. Ready to provide exceptional tier-one voice support at University of Iowa Health Care, supporting critical communication systems across hospital and clinic locations.

PROFESSIONAL EXPERIENCE

Network Engineer

University of Iowa Healthcare, Iowa City, IA - Present

- **Enterprise Voice Infrastructure Management:** Managing and optimizing enterprise-level voice communication systems across multiple hospital and clinic locations, ensuring 24/7 high availability and strict HIPAA compliance for critical healthcare operations.
- **Strategic Digital Transformation (eFax):** Spearheading the enterprise eFax Migration project, successfully transitioning legacy physical fax machines to secure digital fax solutions for the pharmacy department to meet critical operational deadlines.
- **Site Relocation & Network Execution:** Executed the end-to-end network and voice infrastructure migration for the Tiffin Family Medicine clinic relocation, ensuring seamless connectivity and zero downtime for patient care communications.
- **Endpoint Provisioning & Procurement:** Managed the hardware procurement, configuration, and departmental chargeback processes for critical VoIP endpoints, including large-scale deployments of Yealink headsets for clinical staff.
- **Clinical Telecom Support & Optimization:** Providing dedicated tier-one and tier-two telecom support, troubleshooting Avaya PBX systems, and optimizing clinical call flows to maintain uninterrupted emergency and patient care communications.

Senior Voice Support Specialist

Cognizant Technology Solutions, Hyderabad, India |

Provided enterprise-level tier-one technical support for voice communication systems supporting 2,000+ concurrent users across global healthcare and corporate operations.

- **VoIP Troubleshooting & Issue Resolution:** Diagnosed and resolved complex voice communication issues including phone registration failures, call flow routing problems, and carrier connectivity challenges using systematic troubleshooting methodologies and voice monitoring tools
- **Call Quality Analysis & Diagnostics:** Investigated call quality degradation issues including jitter, latency, packet loss, and echo; identified root causes using CDR/CMR analysis and voice quality monitoring dashboards; documented findings for escalation to engineering teams
- **Device Configuration & Deployment:** Installed, configured, and deployed VoIP phones and associated hardware; performed device provisioning, driver updates, firmware upgrades, and network port troubleshooting; ensured proper endpoint configuration and connectivity
- **Hardware & Peripheral Support:** Troubleshot phone hardware issues, headset compatibility problems, and peripheral device failures; managed hardware inventory and communicated supply needs; performed physical installations and equipment maintenance
- **Ticket Management & Documentation:** Managed service requests and incidents using ITIL-aligned ticketing systems; documented issue resolutions with comprehensive technical detail and root cause analysis; maintained knowledge base articles for recurring issues
- **Escalation & Cross-Functional Collaboration:** Escalated complex issues to engineering teams with detailed diagnostic information; collaborated with network and IT departments to resolve integrated voice and data infrastructure challenges
- **Customer Communication & Training:** Communicated technical concepts to non-technical end users in clear, accessible language; provided guidance on phone features and best practices; conducted informal training sessions reducing recurring support requests

VoIP Support Engineer

Mindtree Ltd., Bangalore, India |

Delivered tier-one and tier-two technical support for enterprise VoIP infrastructure and voice communication systems supporting 500+ concurrent users with focus on rapid issue resolution.

- **VoIP System Troubleshooting:** Diagnosed and resolved VoIP infrastructure issues including SIP registration problems, call routing failures, and device connectivity challenges; achieved 95% first-contact resolution rate on routine issues
- **Call Quality Investigation:** Analyzed voice quality metrics, bandwidth utilization, and network traffic patterns; identified root causes of audio degradation and provided optimization recommendations to engineering teams
- **Device Driver & Firmware Management:** Updated and troubleshot device drivers, firmware versions, and software patches; ensured endpoint compliance with organizational standards; managed version control and deployment schedules

- **Phone Hardware Support:** Provided technical support for phone hardware installation, configuration, and troubleshooting; resolved endpoint device failures and compatibility issues; managed hardware inventory and procurement
- **SIP Protocol Analysis:** Gained hands-on experience diagnosing SIP protocol issues using packet analysis tools; understood call flow mechanics, device registration processes, and troubleshooting methodologies
- **Incident Documentation & Knowledge Management:** Maintained detailed incident logs with appropriate technical documentation; created knowledge base articles for common issues; contributed to team runbooks and standard operating procedures
- **ITIL Process Adherence:** Followed ITIL-aligned incident management procedures; managed service request queues; prioritized tickets based on severity and impact; met SLA response and resolution timeframes

Telecom Support Intern

University of New Haven, West Haven, CT |

Gained hands-on experience in voice support, VoIP troubleshooting, telecommunications infrastructure, and healthcare IT operations in academic and laboratory environments.

- **Voice System Support & Troubleshooting:** Assisted in supporting campus VoIP systems; troubleshooted voice communication issues including phone registration, call quality, and device configuration problems
- **Technical Issue Resolution:** Resolved end-user device configuration issues; provided phone hardware support; assisted with firmware updates and driver troubleshooting; escalated complex issues appropriately
- **Ticketing System Experience:** Managed service requests in ticketing systems; documented issue resolutions; practiced incident management and customer communication
- **Knowledge Base Contribution:** Created technical documentation for voice system troubleshooting procedures; developed training materials for voice system features and best practices
- **Healthcare Environment Experience:** Gained exposure to healthcare IT operations; understood HIPAA compliance requirements and clinical workflow considerations; participated in on-call support activities

EDUCATION

Master of Science in Cybersecurity & Networks

University of New Haven, West Haven, CT | GPA: 3.7/4.0 | May 2025

- Advanced coursework in enterprise network architecture, security protocols, and telecommunications systems
- HIPAA compliance and healthcare IT security coursework
- Network troubleshooting and incident response focus

- Strong foundation in technical documentation and security practices

Bachelor of Engineering in Computer Science

CMR Institute of Technology, Bangalore, India | GPA: 7.8/10 | July 2021

CERTIFICATIONS & CREDENTIALS

- **Microsoft Certified: Azure Fundamentals certified**
 - **ITIL Foundation** – Incident management, service management, and change management
 - **Microsoft Teams Certified Administrator (MS-700)** – Voice communication systems and troubleshooting
 - **Ribbon SBC Edge** – PBX system knowledge and voice infrastructure
 - **Five9 Cloud Contact Center certified admin**
-

TECHNICAL COMPETENCIES

Voice & Telephony Support:

VoIP Troubleshooting | Avaya PBX Systems | SIP Protocol Analysis | Call Flow Diagnosis | Device Registration | Phone Hardware Support | Headset Configuration | Driver & Firmware Updates | Network Port Troubleshooting | Call Routing Troubleshooting | SIP Trunk Support | Voice Gateway Configuration | Endpoint Device Configuration | Phone Installation & Deployment

Call Quality & Network Diagnostics:

Call Quality Analysis | Jitter & Latency Troubleshooting | Packet Loss Diagnosis | Echo Cancellation Issues | Voice Monitoring Tools | CDR/CMR Record Analysis | Bandwidth Analysis | Network Anomaly Detection | QoS for Voice Traffic | Network Traffic Analysis | Wireshark Packet Analysis | Voice Quality Metrics

System & Device Management:

MACD Operations (Moves/Adds/Changes/Deletions) | Device Provisioning & Testing | Equipment Installation | Hardware Inventory Management | Firmware Version Control | Software Patch Management | Device Driver Updates | SIP Phone Configuration | Network Port Configuration | Device Compatibility Troubleshooting

Ticketing & Documentation:

ITIL-Aligned Ticketing Systems | Incident Management | Service Request Management | Issue Documentation | Root Cause Analysis | Knowledge Base Creation | Standard Operating Procedures | Runbook Documentation | Technical Writing | Customer Communication Documentation | Post-Incident Documentation

Healthcare & Compliance:

HIPAA Compliance | Clinical Environment Requirements | 24/7 Healthcare Operations | Infection Control Protocols | Emergency Notification Systems | E911/Kari's Law Compliance | Patient Care Impact Awareness | Healthcare Workflow Understanding

Additional Technical Skills:

Active Directory Integration | Network Fundamentals (TCP/IP, VLAN) | Carrier Connectivity Troubleshooting | Voice Recording Systems | Contact Center Applications | SBC Basics | Basic Network Configuration | Remote Support Tools | Technical Support Tools | Equipment Lifting & Physical Installation

KEY VOICE SUPPORT ACHIEVEMENTS

Rapid Issue Resolution & Customer Satisfaction

- Achieved 95% first-contact resolution rate on routine VoIP support issues, reducing escalations and improving customer satisfaction
- Resolved complex call quality issues affecting 100+ users; identified root cause within 2 hours and implemented solution restoring service
- Reduced average time to resolution (ATTS) by 30% through systematic troubleshooting and knowledge base optimization
- Maintained 98% SLA compliance for incident response and resolution across all priority levels

Knowledge Base & Documentation Development

- Created comprehensive knowledge base articles for 50+ common voice support issues; reduced recurring tickets by 35%
- Developed standard operating procedures for tier-one voice support team; streamlined troubleshooting workflow
- Maintained detailed troubleshooting runbooks for common device and software issues; improved team efficiency
- Documented SIP protocol troubleshooting procedures and best practices; enabled faster issue resolution

Device & Hardware Management

- Installed and configured 200+ VoIP endpoints across enterprise locations; achieved 99.5% deployment success rate
- Managed device firmware and driver update cycles; maintained inventory accuracy and coordinated supply needs
- Resolved complex headset compatibility issues; tested various peripherals and documented compatibility matrices
- Conducted physical installation work including equipment placement, cabling, and network port configuration

Training & Knowledge Transfer

- Conducted informal training sessions for end users on phone features and troubleshooting basics; reduced support requests by 25%
- Developed training materials for new voice support team members; accelerated onboarding process
- Created quick reference guides for common troubleshooting scenarios; improved team consistency and efficiency
- Participated in knowledge transfer initiatives and contributed to team learning objectives

Escalation & Cross-Functional Collaboration

- Escalated complex voice issues to engineering teams with comprehensive diagnostic information enabling faster resolution
- Collaborated with network engineering teams on QoS implementation and voice traffic optimization
- Worked with carrier providers to diagnose SIP trunk connectivity issues; coordinated vendor resolution activities
- Supported IT team coordination for integrated voice and data infrastructure challenges

PROFESSIONAL COMPETENCIES

Technical Problem-Solving: Systematic approach to troubleshooting; ability to analyze symptoms and identify root causes; experience with voice monitoring tools and CDR analysis; logical debugging methodology; attention to technical detail

Customer Service Excellence: Strong customer-focused approach; ability to explain technical concepts in non-technical language; patience and active listening; commitment to resolving issues quickly; empathy for end-user frustration in clinical environments

Documentation & Organization: Clear technical writing skills; meticulous record-keeping of issue resolutions; ability to create useful knowledge base articles; organized approach to ticket management; attention to accuracy in documentation

Healthcare Environment Awareness: Understanding of 24/7 clinical operations and urgent communication needs; sensitivity to patient care impact; HIPAA compliance awareness; comfort working in healthcare facilities

Hands-On Technical Capability: Physical ability to perform installations and equipment handling; comfort with device configuration and troubleshooting; experience with hardware setup and testing; willingness to perform physical installation work

Collaboration & Communication: Works effectively within support team environment; communicates clearly with technical and non-technical stakeholders; participates in team meetings and planning activities; contributes to team improvement initiatives

Adaptability & Learning Mindset: Comfortable learning new voice platforms and systems; willing to participate in training on Avaya OneCloud migration; eager to expand voice support knowledge; adaptable to changing environments

Reliability & Accountability: Demonstrates dependability in on-call rotation; takes ownership of assigned issues; maintains consistent quality of work; communicates proactively on progress and status

AVAILABILITY & WORK COMMITMENT

- **Location:** Authorized to work in United States; ready to relocate to Iowa City, Iowa area
 - **On-Call Availability:** Willing and able to participate in on-call rotation for 24/7 healthcare operations
 - **Physical Requirements:** Able to lift and transport equipment to 30+ lbs; comfortable with kneeling, reaching, and accessing equipment in various locations; capable of performing physical installation work
 - **Schedule:** Flexible and available for shift work as needed for healthcare operations
 - **Background Check:** Able to pass criminal background check and credential verification
 - **Work Style:** Comfortable working both independently and collaboratively; strong self-motivation
